IMPORTANT INFORMATION IN CASE OF FIRE

Dear Guest!

An automatic fire-alarm had been built into the pension on behalf of your security. The fire-alarm has an optical smoke-sensor, which is also sensitive to tobacco smoke. Therefore smoking is permitted just in the marked places to avoid wrong alarms.

What is to be done in case of fire

If you observe fire or get to know of it then **you are required** to announce it to the pension staff and other pension guests at first, secondly to the fire department.

In the event of fire-alarming must be reported the following information:

exact place and address of fire
What is under fire, what is exposed,
Is human life in danger,
your name and phone number.

Fire department can be alerted:
through external line (phone number is 105)
through cell phone (phone number is 105).
SOS Emergency service (Hungary) : 112

People who staying at the pension are alerted with the hand-fire signalling system.

Fire-alarm's siren gives sound-signal in case of fire. If you hear this signal you must leave the pension immediately by the escape-ways which are on room doors. You are allowed to return if there is a wrong alarm and the pension staff makes sure of it and permit returning.
